FOOD AND NUTRITION LIAISON COMMITTEE

The committee serves the Foundation by reviewing scientific areas with a view to identifying broad new research and educational interests. The committee also assists in evaluating research and educational proposals and with the evaluation of institutions with capabilities of conducting research projects. It also serves to relate the Foundation's programs to the scientific and technical community.

INFORMATION FOR SUBSCRIBERS

NOTICE: SUBSCRIPTIONS ARE FOR THE CALENDAR YEAR. ALL NEW AND RENEWAL SUBSCRIPTIONS WILL START WITH THE JANUARY ISSUE AND EXPIRE WITH THE DECEMBER ISSUE. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be refunded to the subscriber.

Subscriptions should be sent to The Nutrition Foundation, Inc., 99 Park Ave., New York, N.Y. 10016. Rate $8.00 per year in the United States and other countries. A student rate of $4.00 for the year 1974 is offered to regularly matriculated students in colleges or universities whose subscription application is accompanied by an affirmation of student status signed by an authorized Department representative. Changes of address should be sent to The Nutrition Foundation. In the U. S. ZIP CODES must be included.

Note: Items may be quoted from NUTRITION REVIEWS without special permission. If quotations are made, the editors ask only that credit be given to NUTRITION REVIEWS and that they be made in such a way that the original meaning of the review is preserved.

The publication of NUTRITION REVIEWS has been undertaken to enable professionally trained people to keep abreast of current progress, and to have available an unbiased, authoritative review of the current research literature in the science of nutrition.

The Editorial Staff has been carefully selected so that the publication will merit, in reasonable degree, the confidence of the medical profession and others who work directly with the public in the field of nutrition. The service provided by the publication is distinct from that of an abstract journal, a review for laymen, or an extensive scientific review. Since the reviews as originally prepared by a member of the Editorial Staff are frequently modified by special referees and may be further modified by the Editorial Office in preparing final copy for the press, the Editorial Committee feels that it is preferable not to affix the names of Editorial Staff members to individual reviews. There is thus a high degree of group responsibility on the part of the Editor and Associate Editors.

Signed articles do not necessarily represent the opinion of the Editorial Staff.
